

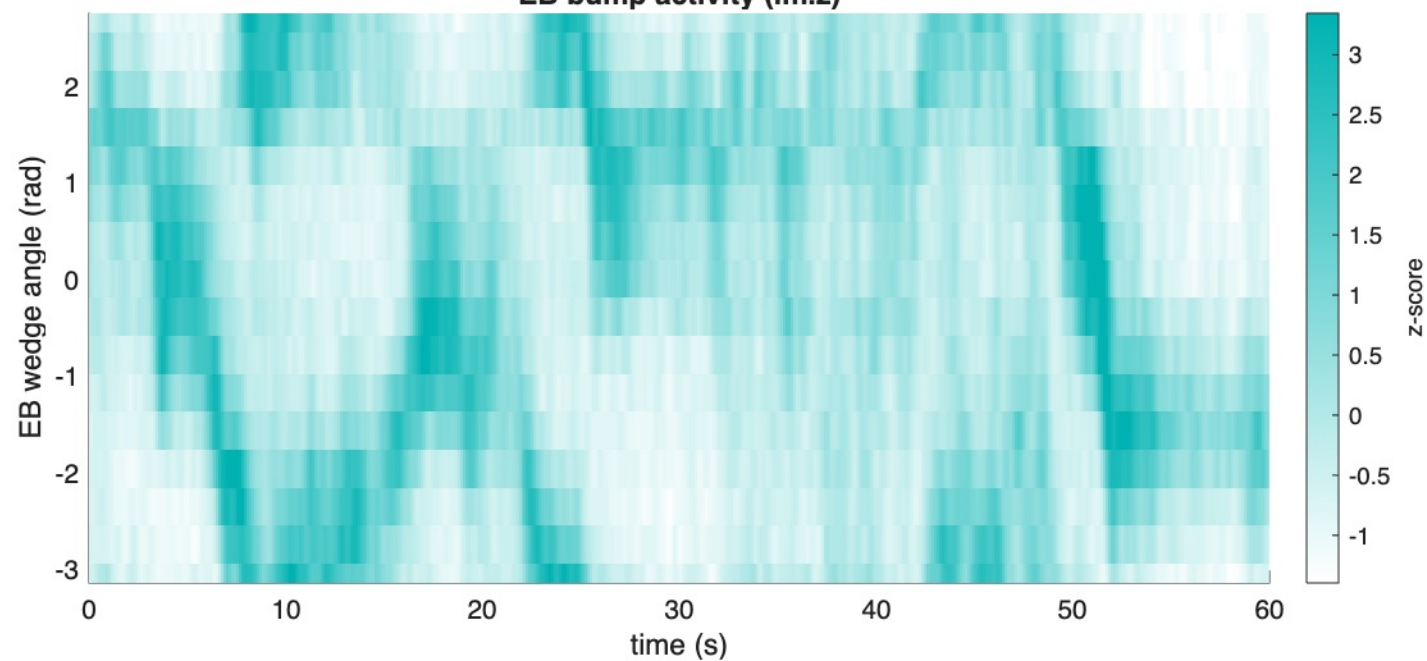

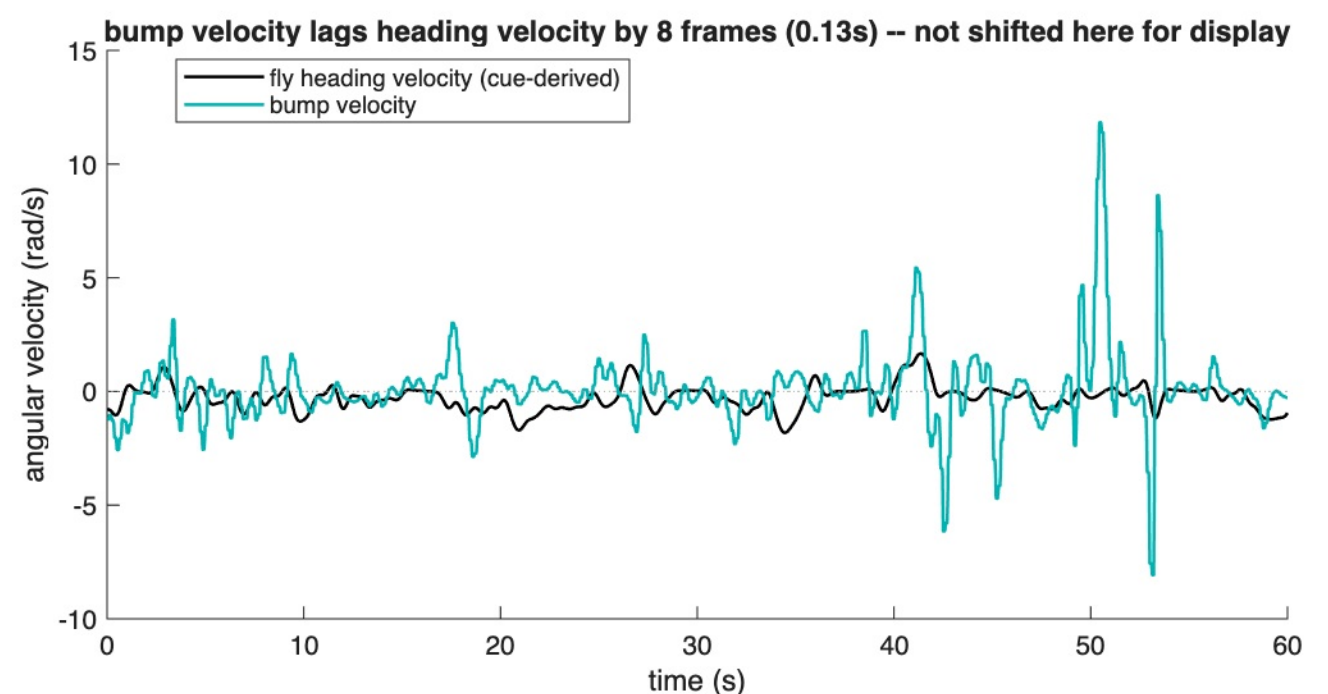

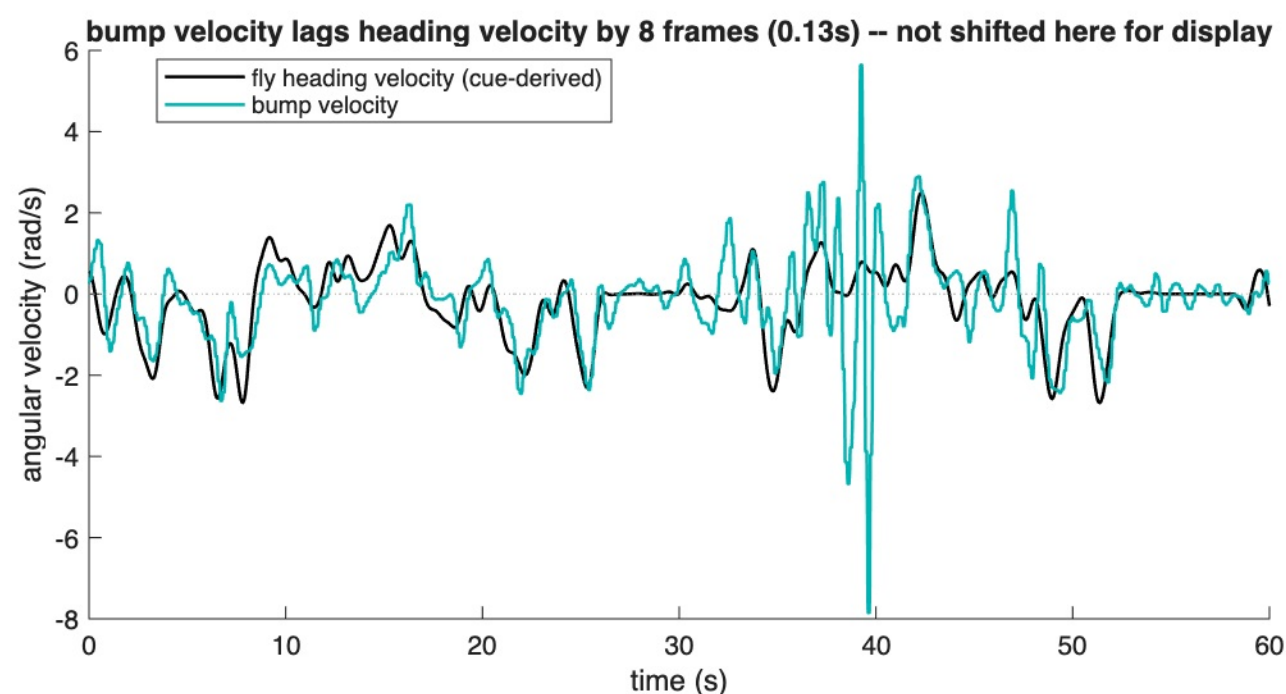

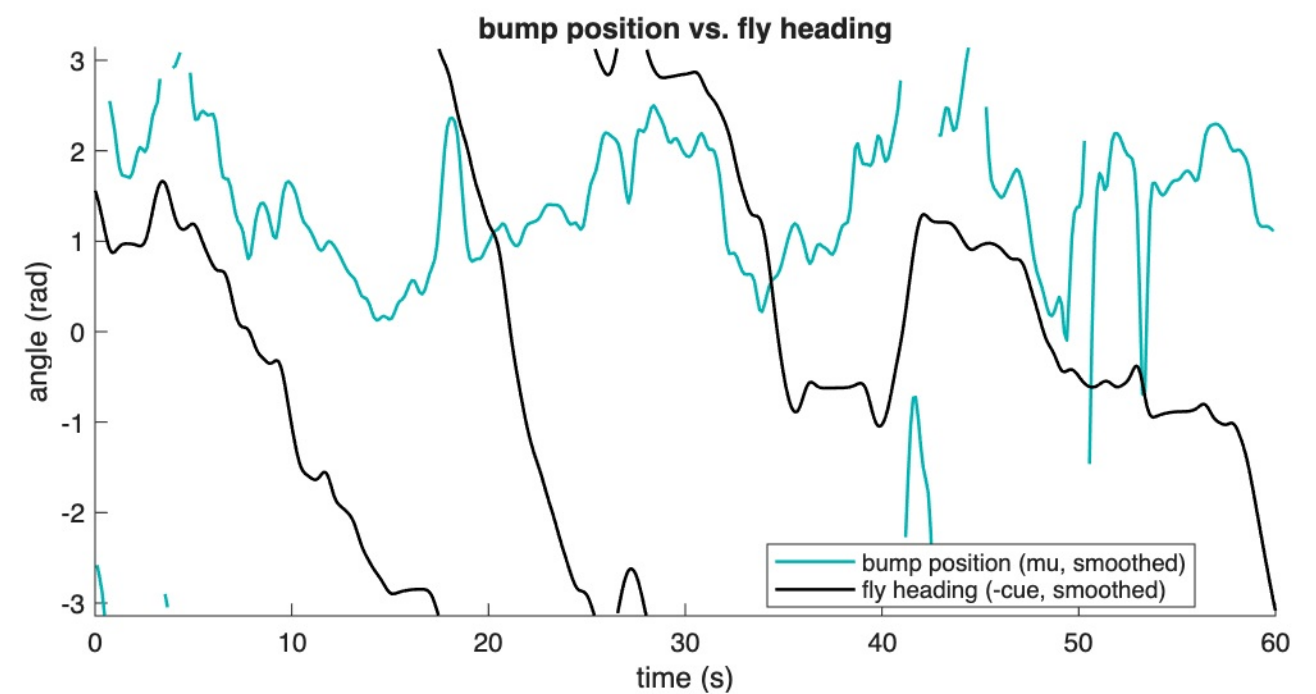

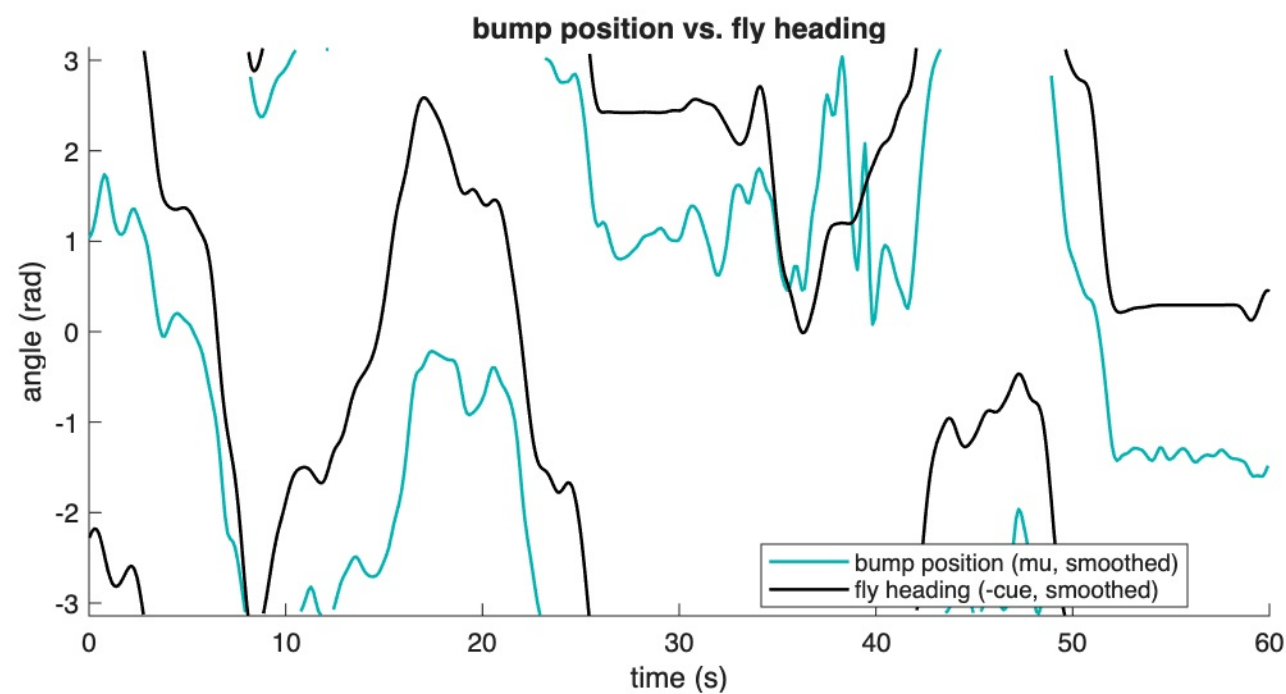

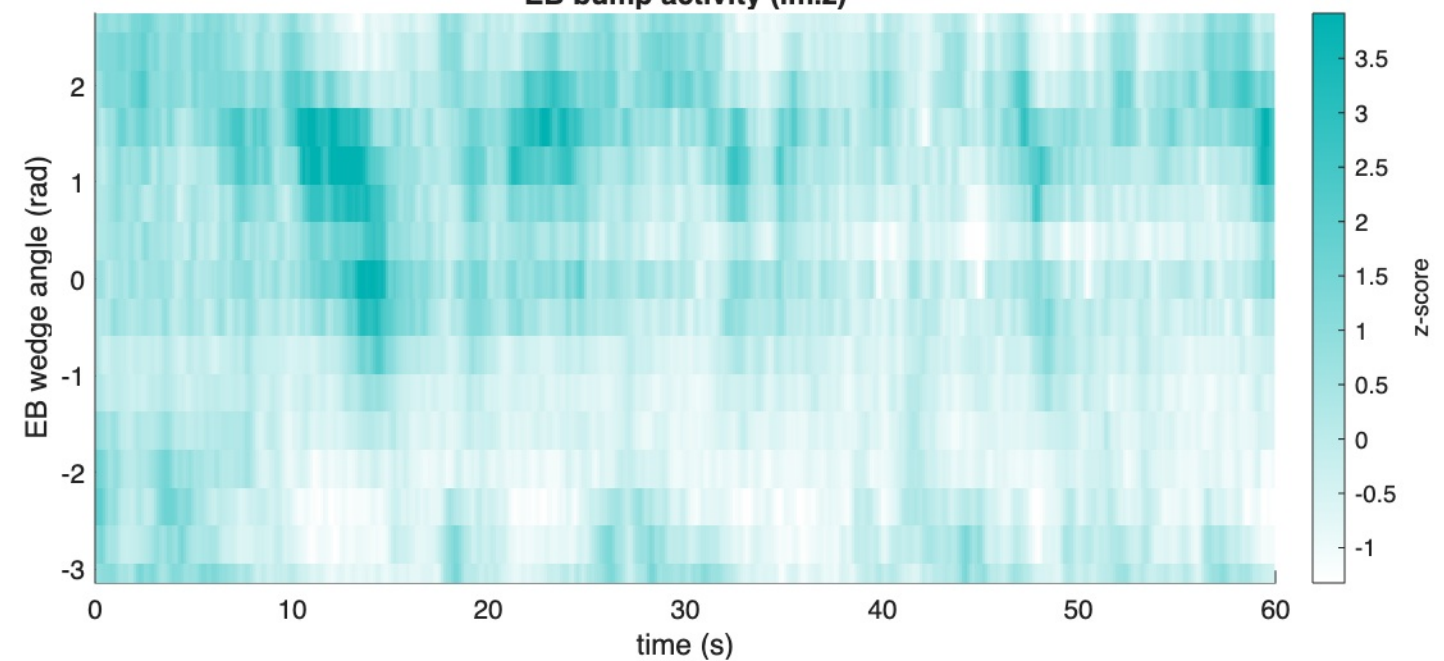

Figure 4: bump tracking examples, empty>kir vs. lpsp>kir (bump=0.00s, heading=1.00s, lag=8 frames smoothing pipeline)

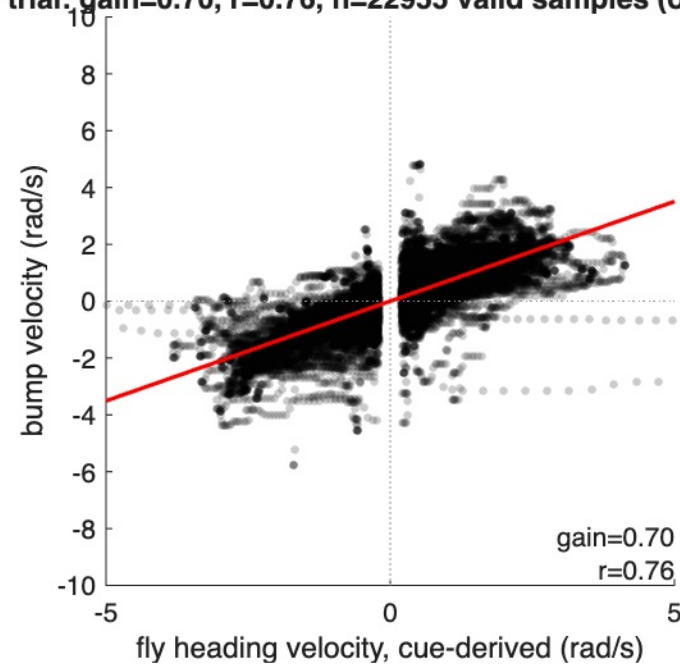

empty>kir example: fly 20231114 fly 2, trial "20231114-3" (closed loop, 60s snippet)
EB bump activity (im.z)

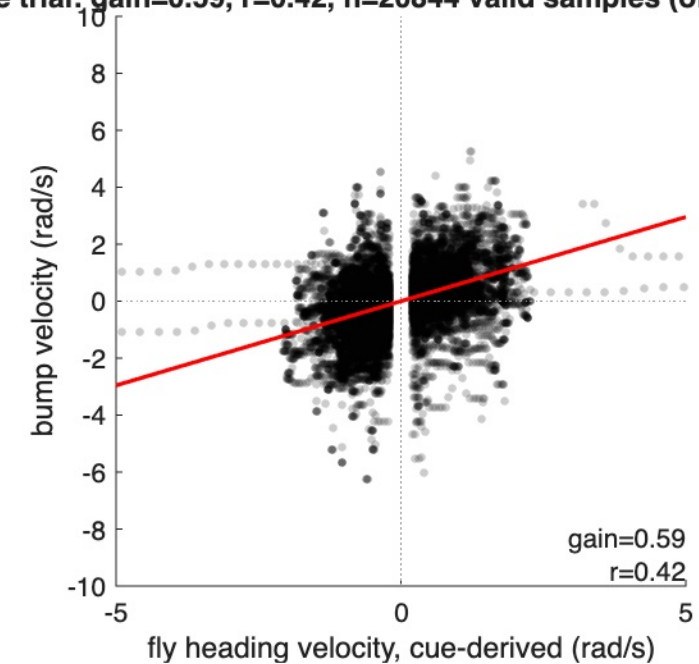

lpsp>kir example: fly 20231205 fly 2, trial "20231205-7" (closed loop, 60s snippet)
EB bump activity (im.z)

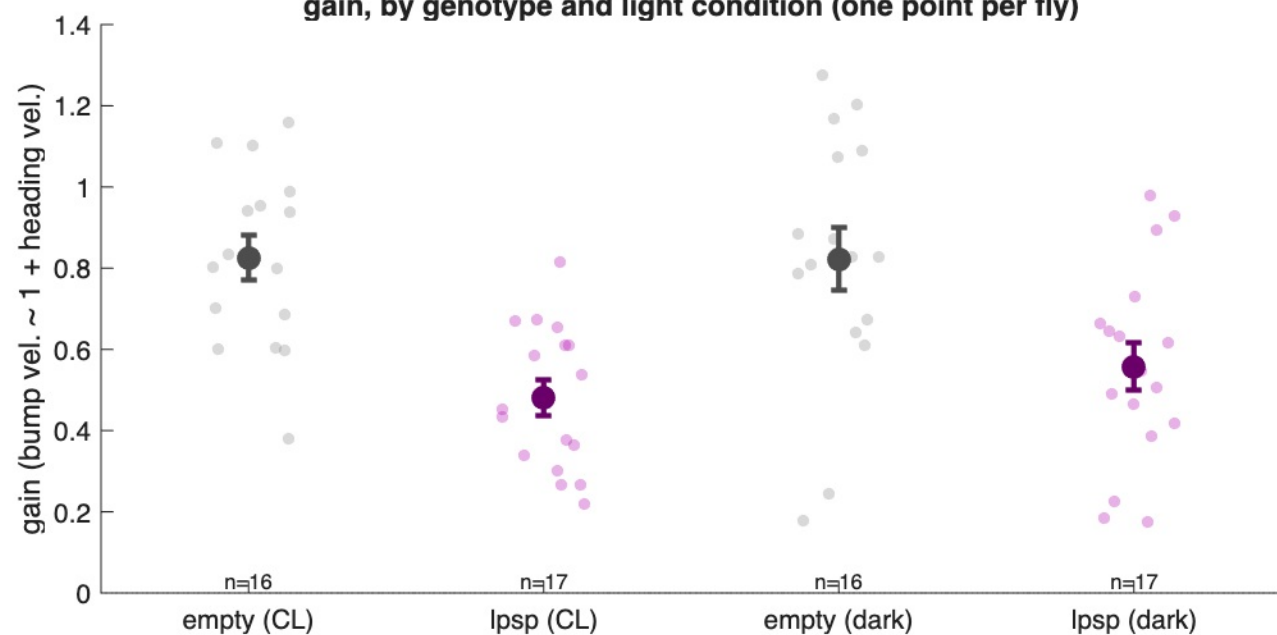

whole trial: gain=0.70, r=0.76, n=22955 valid samples (of 35998 total)

whole trial: gain=0.59, r=0.42, n=20844 valid samples (of 35998 total)

gain, by genotype and light condition (one point per fly)

heading/bump velocity correlation, by genotype and light condition (one point per fly)
