
closed loop: turn-size-resolved bump motion, empty>kir vs. lpsp>kir
mean displacement per turn-size bin
empty>kir (n=16 flies)
lpsp>kir (n=17 flies)
1:1
bump rotation over turn (deg, lag 0.13s)
fly rotation over turn (deg, cue)
gain per turn-size bin (ranksum between genotypes; y clipped)
bump / fly displacement (per-fly through-origin slope)
